DETAILED ACTION

Allowable Subject Matter

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the device claimed by applicant. In particular, the prior art fails to disclose or suggest a fluid treatment device with the cabinet, door, input, output, flask, stressors including an oxygen and ozone source, controller operable to perform as claimed by applicant, along with the other steps and limitations of the claims. Examiner is considering applicant's claim language drawn to the controller, specifically, that the controller is "operable to" perform the claimed functions, as a positive recitation of applicant's claimed functions. Since the prior art controllers do not disclose or suggest the functions claimed by applicant, the instant claims are patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
